

REJECT NAB'S PETITION 04-160 ---- Although the weather and traffic service is not available at this time in my area (but hope it will be soon), I could truly benefit from this service. The local broadcast stations do not provide enough information in the 3 minutes they are allotted to give traffic and weather reports and they are usually not accurate. I don't ever listen to the local stations anymore now that I have XM Satellite Radio. I have listened to the traffic station for Dallas, TX (I used to reside in Dallas) and I was very impressed with the reports given. I think NAB should spend their time on something else (like the trash that is broadcasted), and leave XM radio alone.
